DETAILED ACTION

Response to Amendment

The following is in response to the amendment filed February 6, 2009.

Allowable Subject Matter

Claims 15-17, 19-24, and 26-28 are allowed.

The following is an examiner's statement of reasons for allowance:

In a distributor for an even transverse distribution and propagation of a flowing medium from a conduit, wherein the distributor comprises a distribution gap connected at one end to the conduit and having a first depth, an outlet gap connected to the other end of the distribution gap and having a second depth greater than the first depth, and an edge substantially transverse to the direction of flow corresponding to the end of the distribution gap in connection with the outlet gap, the prior art does not disclose or suggest the combination of a distribution gap that diverges conically from the conduit to the edge, an edge in the shape of a circular arc, and a second depth from 1.2 to 4 times the first depth. The propagation of a flowing medium through the above distribution gap provides an even and parallel flow along the outlet gap. Prior art distributors are not accordingly shaped.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed February 6, 2009 have been considered.

In view of the arguments and amendment to the claims, Applicant has overcome the rejections set forth previously under 35 U.S.C. 102(b)/103(a) over Radvan et al (US 3,937,273), over Reiner (US 4,021,296), over Bubik et al (US 4,280,870), over Bubik et al (US 6,372,092), and under 35 U.S.C. 103(a) over Fredriksson et al (US 5,571,383) in view of Bubik et al (US 4,280,870). It is recognized that none of the above references, alone or in combination, suggests the claimed features of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Danielsson (US 7,311,803) discloses a flow distribution unit of the type as disclosed in Fredriksson above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Hug whose telephone number is (571) 272-1192.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571 272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
